CATALOG GUIDE

How to read the complete catalog

A concise navigation layer for specialists reviewing the full 566-item collection.

Each PropyKeys Token ID appears exactly once in the primary inventory. The catalog is organized through thirteen conceptual worlds and thirty-six mutually exclusive primary groups so specialists can move quickly from collection scale to individual records. Secondary tags reveal useful cross-connections without changing a record's primary curatorial home.

FIELD	HOW TO READ IT
Token	Unique PropyKeys Token ID, prefixed “TK” for fast searching.
Display name	Controlled display name for the digital-asset record.
Associated location	Address or geographic subject carried by the underlying source record.
Primary curatorial group	The record’s single controlling group within the 36-group architecture.
Secondary tags	Cross-cutting subjects that help specialists discover related holdings.
Reading flags	SIGNATURE identifies one of the ten representative holdings; CURATORIAL 100 identifies a selected high-interest record. Neither is an appraisal or value conclusion.

Purpose: This catalog is a searchable collection inventory for specialist review. It is not an appraisal, ranking, or statement of title to the underlying real-world properties.
